

# Seki's APT Repository

Katsutoshi Seki | Published: January 2, 2024 | Source: <https://sekika.github.io/2024/01/02/apt/>

Seki's APT repository contains Debian packages for Python packages produced by Katsutoshi Seki. List of packages:

- [python3-hystfit](#)
- [python3-kaidoku](#)
- [python3-passme](#)
- [python3-unsatfit](#)

To add this repository, append the following line to [/etc/apt/sources.list](#) or a file with `.sources` extension under `/etc/apt/sources.list.d`:

```
deb https://seki.webmasters.gr.jp/apt stable main
```

or in deb822-style format

Types: deb  
URIs: <https://seki.webmasters.gr.jp/apt>  
Suites: stable  
Components: main  
Signed-By: [/etc/apt/trusted.gpg.d/seki-apt-stable.asc](#)

To add the GPG key for this repository, execute the following commands:

```
wget -qO ~/seki-apt-stable.asc https://seki.webmasters.gr.jp/public.key  
sudo mv ~/seki-apt-stable.asc /etc/apt/trusted.gpg.d/
```

For verification, the GPG key ID is:

6A59117FE8298E69B62F935F13DBE2778EBBF181
